CONTENT	
Reduction of the space dedicated to the pilot plan.	Done
Problems found, their impact, solutions, upgrades proposed, metrics and results of the solutions.	Done
Focus the demo in the star feature of the Project.	Done
Show the logged profile in the navbar during the demo .	Done
Performance metrics and reward system for the team.	Done
Estimation of the team's group tasks and	Done

hours.	
To say if the situation is better than last sprint, saying the progess both for the sprint and the project with a burndown graphic. Estimate the future progress.	Done
Generalized technologies' risks analysis	Done
Create a metric for each probem and solution. Measure of the solutions before and after applying them and show the progress of the problem related to the solution.	Done
Update the estimation problem and its solution	Done
Update the big tasks' problem and its solution	Done
Metrics for the perfomance of the project manager related to tasks' distribution and estimation.	Given that the tasks' distribution and estimation is done by the whole complete team, the team considers that it isn't necessary to develop this metric due to the fact that tasks are estimated and distributed by the whole team.
Include the percentage of deviation from the estimated and done in matter of tasks and/or time.	Done
Update the considerations related to programming and its function in the project, its need of using it in the platform and the opportunities offered related to it.	Done
Stable deployment of the platform.	Done
Explain if there is any upgrade in the project development since the previous sprint and provide a general vision of the project's development.	Done
